Syam 12:30 PM

Hello @channel , 👋

We are excited to announce `Project Pluto` , as the feature has just reached `alpha` ! 🎉

Instead of me telling you what the feature does, see it for yourself! ☺️ We've attached a 2 minute `uncut` video of the demo. Hope you guys can take a look and comment your thoughts on this thread.

[After watching the video, take a look at the thread for more details]

This is a great initiative @Syam. Kudos!! AR and VR will play a significant role in the customer decision making in the future. Furlenco must stay ahead of the curve and act as pioneers in bringing practical applications of this technology to help customers and internal teams. Great Job on the POC.
